Experience

Freelance Full-Stack Developer

July 2023 – December 2025

- Built and deployed full-stack web applications for small businesses, student organizations, and campus use cases using React, Next.js, Node.js, and PostgreSQL.
- Implemented authentication, CRUD workflows, REST API integrations, & responsive UI components with optimized UX.
- Developed internal automation workflows using n8n for scheduling, data syncing, and third-party API tasks.
- Created and maintained Discord bots for community management, notifications, and automated moderation using Node.js and cloud hosting.
- Developed lightweight web scraping tools for data collection and report generation using Python and Playwright.
- Managed deployments (Vercel, self-hosted), version control (Git/GitHub), and client communication to deliver scoped features on time.

Web Development Intern – Bayoa Analytics Engineering

September 2024 – November 2024

- Assisted in developing internal dashboards and analytics interfaces using TypeScript and component-driven frontend patterns.
- Modeled and migrated relational schemas from Prisma ORM to Drizzle ORM, improving query performance, structure consistency, and long-term maintainability.
- Collaborated with senior engineers on architecture discussions, sprint planning, and code reviews using Git-based workflows.
- Gained hands-on exposure to full-stack application design including database modeling, deployment pipelines, and web architecture fundamentals.

Education

University of the Philippines – Cebu

Lahug, Cebu City, Philippines

Bachelor of Science, Computer Science.

Expected June 2027

Relevant Coursework: Data Structures & Algorithms, Web Development, Software Engineering, Systems Analysis & Design

Leadership & Activities

University Projects and Hackathons

Cebu City, Philippines

Project Lead / Team Collaborator

2023 – Present

- Location-Based Attendance Verification System — Led a five-member team to develop a mobile-first web application for attendance tracking with geolocation and proof-of-attendance features; led backend development, designed ERD and database schema, integrated APIs for real-time course and session management, coordinated weekly virtual meetings, assisted UI/UX coordination via Figma, and maintained repositories on GitHub.
- TETWIST — Collaborated in a team of four to develop a Tetris-inspired game with Star Blocks, Bomb Blocks, and Board Flipping; polished and optimized C++ code, implemented data structures (deques, vectors, classes), and enhanced gameplay mechanics such as line clearing and random block generation.
- KOMSAI Week Hackathon 2025 — Documented technical data and project information, organized and presented the project concept, delivered the group pitch presentation, and gained hands-on experience in technical communication and rapid prototyping.
- Certifications & Training: Trend Micro Philippines — Capture the Flag (CTF), Participant, August 22, 2025 (Ranked 113th nationwide); PicoCTF Africa, Participant, October 2025.

Skills & Interests

Languages: JavaScript, TypeScript, Python, C, C++, C#, Rust, Go

Frameworks/Tools: React, Next.js, Node.js, Supabase, PostgreSQL, Drizzle ORM, Prisma ORM, n8n, REST API integration

Other: Web scraping (Python/Playwright), Discord bot development, Git/GitHub, Docker (basic), Linux, networking, CI/CD workflows, Authentication & Authorization, API integration, Cloud deployment (Vercel, Render),

Language: English (fluent), Cebuano (native), Filipino (native).

Interests: Cybersecurity & reverse engineering, full-stack product development, automation workflows, AI-driven tooling, game development, and applied digital security.
